

📍 INDIA EXPO MART, GREATER NOIDA (DELHI NCR) 📅 17- 18 November 2026

IGHA – HYVOLUTION INDIA 2026

Where Global Hydrogen Meets India's Clean Energy Ambition

November 2026. India Expo Mart, Greater Noida, Delhi NCR. Two days that the global hydrogen community has been waiting for.

IGHA – Hyvolution India 2026 is the inaugural India edition of the globally recognised Hyvolution platform – the world's leading international exhibition dedicated to the hydrogen ecosystem, organised by GL Events since 2016. For the first time, that global community – the project developers, technology providers, investors, policymakers, and industrial leaders who are building the hydrogen economy – is coming to India.

Co-created with GH2 India, India's foremost green hydrogen industry alliance, and supported by India's National Green Hydrogen Mission, this is not just another industry event. It is the platform where India's hydrogen future gets decided – and where the world comes to be part of it.

150+ Exhibitors	3,000+ Trade Visitors	30+ Countries	14,000+ sqm Event Area
1,000+ Delegates	200+ Speakers	50+ Sessions	2 Days

THE EVENT AT A GLANCE

TWO PILLARS. ONE POWERFUL PLATFORM.

IGHA – Hyvolution India 2026 runs on two integrated pillars – the Exhibition and the Assembly – each serving a distinct but complementary purpose.

THE ASSEMBLY

India's most significant high-level hydrogen congress – structured around the Strategic Conference, Technical Conference, and Leadership Roundtables. This is where policymakers set direction, investors find bankable projects, and industry leaders make the decisions that shape the market.

THE EXHIBITION

A global business marketplace bringing together 150+ exhibitors from across the full hydrogen value chain – from production and electrolyzers to infrastructure, mobility, industrial applications, and carbon management. Trade visitors come here to see what is real, meet the companies building it, and find the partners they need.

Organised by :

📍 INDIA EXPO MART, GREATER NOIDA (DELHI NCR) 📅 17- 18 November 2026

WHY INDIA. WHY NOW.

India's Hydrogen Moment Has Arrived.

India's National Green Hydrogen Mission targets 5 million metric tonnes of green hydrogen production annually by 2030, backed by over ₹8 lakh crore in projected investments and the creation of over 6 lakh jobs. Industrial demand from steel, fertilisers, refining, and maritime is creating real off-take pipelines. Renewable energy costs give India a structural production advantage.

The world is watching India's hydrogen market. IGHA – Hyvolution India 2026 is where the world comes to engage with it – directly, seriously, and at the highest level.

EVENT DETAILS

Dates: 17–18 November 2026
Venue: India Expo Mart, Greater Noida, Delhi NCR, India
Co-organised by: GL Events, GH2 India, Apoltos Events (AEPL)
Supported by: National Green Hydrogen Mission (NGHM), Ministry of New and Renewable Energy, Government of India
