

📍 INDIA EXPO MART, GREATER NOIDA (DELHI NCR) 📅 17- 18 November 2026

HYVOLUTION

The World's Leading Hydrogen Platform

Since 2016, Hyvolution has been bringing the global hydrogen community together. What began as a pioneering trade show in Paris has grown into the world's most trusted international platform for the hydrogen economy.

Hyvolution is organised by GL Events — one of the world's premier exhibition and events companies, operating across 20+ countries. The Paris edition, held annually at Paris Expo Porte de Versailles, is the flagship event and the benchmark against which all other hydrogen exhibitions are measured. But Hyvolution is no longer just Paris. It is a global network.

Each Hyvolution edition is strategically placed in a high-potential hydrogen market — giving international companies direct access to local ecosystems, active projects, investors, and industrial decision-makers. The network currently spans Paris, Brazil, Chile, Canada, and now, for the first time, India.

WHAT MAKES HYVOLUTION DIFFERENT

MORE THAN A TRADE SHOW. A BUSINESS PLATFORM.

Hyvolution is built around a simple but powerful premise: the hydrogen economy will only scale if the people who need to work together are actually in the same room. Not on a webinar. Not exchanging emails. In the same room, at the same time, with a common purpose.

That is why Hyvolution events are designed not just for visibility, but for outcomes. Every edition brings together the full hydrogen value chain — from production and infrastructure to industrial applications, mobility, and carbon management — alongside the investors, policymakers, and project developers who determine where the market goes next.

400+ Exhibitors (Paris 2026)	65+ Countries (Paris 2026)	40,000+ Global Community	10+ Years of Editions
